Durgesh Singh

Summary

I'm a web developer who knows how to create websites and applications using a bunch of different tools. I'm good with the basics like HTML, CSS, and JavaScript, including jQuery. I can handle the server-side stuff with PHP and manage databases using MySQL. Specifically, I'm really good with Laravel, which is a framework for building websites.

Experience

W3care Technologies Pvt. Ltd. - Laravel Developer
Jaipur, India
09/2022 - Current

As a Laravel Developer at W3care Technologies Pvt. Ltd., I specialize in creating web applications using a range of technologies. My skills include proficiency in HTML5, CSS3, JavaScript, jQuery, PHP, MySQL, Laravel.I contribute to the development of dynamic and responsive websites, ensuring a seamless user experience.

Projects

- Samraddh Bestwin Microfinance:- It is a web-based software solution designed to function as a comprehensive banking system, enabling efficient management of all funds-related data and user accounts. This project aimed to provide a secure and user-friendly platform for overseeing financial transactions, monitoring account activities, and ensuring the integrity and confidentiality of sensitive financial information.
- Sri Saathi Micro Finance:- As a web application developer, I was responsible for creating a secure and user-friendly banking website aimed at managing financial transactions and user accounts. My primary goal was to ensure ease of use and safety for handling transactions while keeping sensitive financial information protected.
- Designed and developed a robust web application using modern web development technologies.
- Implemented features for managing user accounts, including registration, login, and account settings.
- Developed functionalities for handling financial transactions securely, ensuring data encryption and protection.
- Implemented account activity tracking to provide users with insights into their transaction history.
- Ensured compliance with security standards and best practices to safeguard sensitive financial details.
- Collaborated with UI/UX designers to create an intuitive and user-friendly interface for seamless navigation.
- Successfully launched a fully functional banking website that met the requirements of both users and stakeholders.

Overall, my role involved designing, developing, and maintaining a banking website that prioritized user convenience, security, and data protection.

• **W3care Technologies Pvt. Ltd. - PHP Trainee**

Jaipur, India
I completed a comprehensive training program at W3care Technologies Pvt. Ltd., where I acquired valuable skills in web development. Throughout the program, I gained proficiency in a range of technologies including:

- HTML5
- CSS3
- JavaScript
- jQuery
- MySQL
- Core PHP
- Laravel

- Webflow
- AJAX

This experience has equipped me with a strong foundation in web development, allowing me to effectively contribute to projects and solve complex problems in the field.
